

# DESIGN/SHOP

12 by melco

WHERE EMBROIDERY MEETS EASY

## INTUITIVE INTERFACE

- Tailor your workspace effortlessly with customizable themes, space-saving features and unlimited tabs for easy design navigation.
- Dive into the seamless, familiar Windows experience of DesignShop 12, where intuition meets power in design.
- Communicate effortlessly with your embroidery machine through MelcoOS Integration, ensuring lightning-fast embroidering on Melco machines.

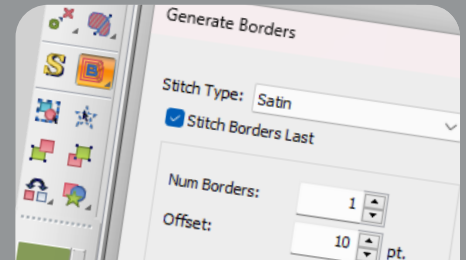

## CROSS-STITCH

Emulate the charm of handmade cross-stitching effortlessly with our innovative stitch-types.

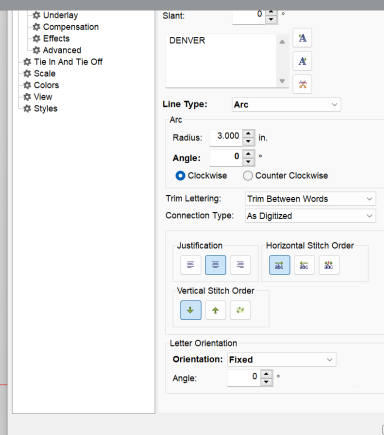

## CORNER CONTROL

Rounded and chamfered corners are easier than ever with the new corner tool.

## BETTER BORDERS

Attain mastery in adding multiple borders around elements or whole designs.

## ENHANCED LETTERING

Get more control over lettering elements with enhanced **arched text**, **typing on paths**, and an easy to use **text-box editor**.

**PLUS: Easily create your own alphabets from individual designs. Great for working with lettering design sets purchased from third party creators!**

## TOTAL CONTROL, ANYWHERE

Enjoy the convenience of user account management with new cloud-based licensing, allowing for seamless transitions between computers while enjoying updates delivered straight to your account.

## HI-RES PNG EXPORT

Export stunning hi-res PNG images with our advanced 3D stitch preview, perfect for achieving an embroidery look on DTG or Dye-sub printing. Put "embroidery" anywhere!

## PRECISION AUTO-DIGITIZING

Upgrade your digitizing game with our enhanced conversion assistant, ensuring pinpoint accuracy. Refine results swiftly using color-based element selection.

## PROFESSIONAL PRODUCTIVITY

**Automation:** Accelerate digitizing and product creation with the automation of common tasks like Auto Primer Stitch, Auto Basting Outline, Auto Underlay, Auto Stippling and Auto Sequencing.

**Organization:** Streamline your production process with design barcoding. By using a barcode reader at anytime to recall the design, you can eliminate the need to search for design files on hard drives or disks. You can also save design information, such as stitch densities, to specific fabrics or apply fabric profiles to specific designs.

**File Support:** DesignShop 12 supports a broad spectrum of industry standard file types, including DST, EXP, EXP+, EPS, ART8, PES, EMB\* and more. Plus, our proprietary OFM format allows wireframe editing, machine settings, and color information to be saved and loaded for production.

**Built-In Thread Charts:** Built-in charts for Madeira, Isacord, Coloreel, Glide and other major industry brands.

Experience the DesignShop difference with a **30-day risk-free trial!**

## 4 Levels To Meet Your Needs
